Remember:

Mission:

ISS Solutions delivers outstanding service and minimizes the total cost of ownership of clinical engineering and information technology assets for our clients.

About ISS Solutions:

ISS Solutions provides specialized technology lifecycle management solutions to healthcare and commercial organizations. For more than 30 years, their experts have helped organizations maximize performance through timely, accurate, and cost-effective clinical engineering and information technology support services, both increasing productivity and ensuring regulatory compliance. Their extensive service offering is customizable and can be applied selectively or as part of a single-source managed services program.

ISSSolutions[®]
Technology Lifecycle Management

“Joint Commission examiners are not lavish with compliments; but, they said our clinical engineering performance was the best in the country in a number of areas. ISS Solutions has done a superb job of preparing us for inspections.”

—Susan Hallick, R.N., Geisinger Health System Chief Nursing Officer

“We have a long history with ISS Solutions’ contact center. When we ask ourselves if another service provider can bring more to the table, we find that ISS Solutions is unsurpassed in quality of service as well as value.”

—Mike Boudreau, OKI Data Americas Customer Support Center Senior Manager

“My customers are the Lenox warehouses, stores, and the office personnel. Repairs are transparent to them. It’s like an umpire’s job: You make the right call and no one knows. You make the wrong call and everyone’s hunting for you. ISS Solutions is the right call for your IT Infrastructure support needs.”

—Tom Johnson, Lenox Group Director of IT Infrastructure
